Published by the Senior Class

Foreword

Here is our annual for "53"

A pleasant reminder for you and me,

A few precious pages to own and to hold,

To remember your classmates when you grow old,

With pictures and stories of classes now past,

And those pleasant memories that last and last.

Howard Parks

We, the graduates of 1953, take this last opportunity to express our sincere appreciation by dedicating this annual to Alva F. Allen. We are bestowing the highest honor in our power upon him whose understanding and guidance as our sponsor has led us through our Junior and Senior years. Each graduate of the Senior Class of "53" would like to say, "Congratulations and thanks to you--Alva F. Allen."

Class Prophecy

It is about 7:00 o'clock on a beautiful summer evening in the year of 1963. We are on our way to attend an elaborate banquet in honor of the graduates of ten years past, sponsored by the most gracious Mrs. Robert Lewis, the former VIANA COVER. They have flown from Wyoming where they live with their two sets of twins. ROBERT LEWIS has been a big success in Wyoming where he owns a large ranch.

We are now flying over the outskirts of Rensselaer which is now a small suburb of Fair Oaks. We see WILLIS PETTET'S world famous Fly-In-Theater for helicopters, the first of its kind. As we near our destination we see a streamlined elevator in Parr, another suburb of Fair Oaks. The elevator is owned by JERRY BRUNTON, who is now playing professional football. We also see a modern school where Mrs. Halleck Long, the former PHYLLIS PHARES, is a primary teacher.

We have now reached Fair Oaks where the banquet is to take place. Fair Oaks is a thriving metropolis which is now the largest city in the world. Its fame is due to a discovery made by the chemistry class of 1953, headed by the now famous professor of the University of Fair Oaks, RAYMOND MATTOCKS, who is married to Lois Brooks. They have discovered how to make uranium from sandburs. We see approximately 500 enormous greenhouses where they raise nothing but sandburs. The greenhouses are owned by RAY BOZELL, who is married to Leona Dunn. They have several little Bozells.

It is only 7:15 so we decide to fly over to see where Mrs. Gene Koster, the former EVELYN DYKHUIZEN, lives. We have heard that her husband has established a very reliable canning factory called "The Koster Asparagus Company." They not only can the asparagus but own several farms on which they grow asparagus and a few little Kosters. There is also the home of DARLENE VLAHOS, wife of the famous professional basketball player, Larry Slinkard. Next door is the very magnificent home of the former GEORGIA WILLIAMS. She is the most famous hair designer of the world. As a hobby she designs clothes.

It is about time for the banquet and as we start back to the school we see the former MARY ELLEN CRAWFORD leaving a modern hospital in a 1963 Pontiac convertible. She is now the head record librarian at the hospital. Off in the distance we see an airplane factory owned by LAYTON PROFROCK who designed the first space ship that went to the moon. As we near the business section of Fair Oaks we find that DEAN WOODS is now head of all the police departments in this section of the country.

The banquet was a big success and we are happy to report that the entire class is married and all are raising a family. In 1973 we hope to meet in the Fair Oaks Waldorf Astoria for an even more elaborate celebration.

PLACE: All three acts take place in the living room of the Austin home in Sunnyfield, a small country town.

TIME: Summer.

Georgia Williams, Layton Profrock, Eddie Cox, and Dean Woods worked hard preparing tickets, setting up stage props, etc. Thus everyone helped to make the play a big success.

Since we, the seniors, are to give our play in the spring, we have not picked it out as yet. We are hoping for a better performance than ever before.
